1. Overview

This Operations & Maintenance (O&M) course guides participants through various operational processes, providing essential skills and knowledge for System Administration tasks, Application Monitoring, and Troubleshooting.

It covers the available System Administration apps, tenant utilization policies, and limits within the application to ensure effective data management across an organization, as well as system monitoring practices.

Note that this course is designed with a Tell Me and Show Me learning format to cover all the required theoretical concepts at the advanced level and the Try Me formats cover the various business use cases.

2. Objectives

By the end of this course, you will be able to:

- Understand the available System Administration apps.
- Understand the various tenant policies, allocations, and limits.
- Understand the system monitoring app and reports.

3. Duration

The course duration is 213 minutes.
